

## Injection Tray

The GuardOn range of medical hollowware is made from sugarcane bagasse, a readily renewable resource and an environmentally friendly alternative to plastics because unlike plastic which take years to break down in landfill, it is compostable and biodegradable.

The GuardOn Injection Tray is an ideal solution for organising and holding a variety of medical essentials such as syringes, hypodermic needles, ampoules, vials, and dressing materials. Its size and sturdiness make it a perfect fit for securely accommodating these critical medical items, ensuring easy access and reducing the risk of contamination. This tray's thoughtful design not only enhances medical practitioners' efficiency in preparing injections and procedures but also contributes to maintaining a hygienic and organised medical environment.

### GuardOn Injection Tray

**Dimensions**

200 x 70 x 28.5mm

**Material**

Sugarcane Bagasse

**Features**

Rigid Base, leak & oil proof,  
puncture resistant

**Colour**

Natural

**Surface Finish**

Smooth

**Liquid Capacity**

Holds liquids up to 90°C  
for at least 24 hours

**Liquid Compatibility**

Not compatible with  
alcohol based liquids

**REORDER CODE**

EHD12JT

**STANDARDS**

EN 13432

**RECOMMENDED USE**

Ideally sized and sturdy enough to  
hold syringes, hypodermic needles,  
ampoules, vials and dressing

**PACKAGING**

500 units per carton

**MANUFACTURING ACCREDITATIONS**

ISO 14001 Environment Management
